Karim Majed

SOFTWARE ENGINEER – BACKEND | C# / .NET | AZURE | SQL

Montréal, QC, Canada | karim_majed@outlook.com
linkedin.com/in/karimajed9 | github.com/Karimajed9 | karimmajed.com

PROFESSIONAL SUMMARY

Backend-focused Software Engineer with 5+ years of experience building C#/.NET enterprise systems, Azure integrations, and large-scale SQL data workflows. Skilled in reusable backend frameworks, REST APIs, asynchronous messaging, idempotent financial processing, production troubleshooting, and performance optimization.

TECHNICAL SKILLS

Languages & Backend: C#, SQL, Java, ASP.NET, .NET Framework, REST APIs; Spring Boot (personal project)
Azure & Integration: Functions, Logic Apps, Web Apps, Blob Storage, message queues, SFTP, Sage APIs
Data & Reliability: SQL Server, stored procedures, CSV/Excel ETL, idempotency, Application Insights, Datadog
Other Tools: JavaScript (client-side event handlers), Git, Jenkins, Jira, Azure Key Vault; React/TypeScript (projects)

PROFESSIONAL EXPERIENCE

Software Developer - Redmane Technology | Nov 2022 - Present | Montréal, QC

- Designed a reusable C#/.NET due-date framework with configurable deadlines and compliance rules; simple new workflows require only minimal custom-event code.
- Built complex caregiver disbursement calculations using placement history, child ages, care levels, service types and rate schedules to support accurate payments.
- Engineered Azure Functions integrating case-management and Sage APIs via nightly batches and HTTP-triggered, queue-based workflows; used unique transaction IDs for idempotent synchronization.
- Implemented retries, Azure Blob Storage recovery, Application Insights monitoring and targeted failure notifications for financial integrations.
- Rebuilt deprecated Azure Logic Apps migration workflows processing millions of records using SQL, stored procedures and CSV/Excel files, with validation, deduplication and detailed error reports.
- Optimized C# backend event handlers by avoiding redundant processing; built nightly API-to-SFTP government reporting exports involving thousands of records.

Java Developer - Wiley Edge / National Bank of Canada | Sep 2021 - Sep 2022 | Montréal, QC

- Developed 50+ Java application features and extensions for an internal customer-service system used by 100+ bank employees.
- Debugged and resolved 100+ functional and UI defects in the application.
- Contributed to sprint delivery and code quality in a 15-person Agile/Scrum development team.

SELECTED PROJECT

Personal Portfolio Platform | Java, Spring Boot, PostgreSQL, React, TypeScript
Developing a portfolio with a React/TypeScript frontend, Java/Spring Boot REST APIs and PostgreSQL; architecture and side projects detailed at karimmajed.com. | karimmajed.com

EDUCATION & LANGUAGES

Graduate Diploma in Computer Science | Concordia University, Montréal | 2021
BBA, Management Information Systems | American University of Beirut | 2020
Languages: English, French and Arabic (fluent)
